## A Few Words From our Managing Director...

Ever since our inception in 1997 it has been our sole purpose to produce high quality apparels made to meet the needs of the buyer, with inch-perfect accuracy and high reliability.

I can say with pride that Divine Group Ltd. is one of the few elite private sector business groups who have been able to balance high levels of quality, production and social responsibility. To the point that maintaining quality and social standards have become second nature to our operating procedures.

In conclusion, if I was to sum up this company in a few words, it would be that we are a family. From the managerial desks to the production floors, we are a family that synergizes together to be greater than the sum of its individual components, and we excel only through the dedication of all our members.

Thank You
